

# The Business and Project Management of Vaccine Development Workshop

TUESDAY, OCTOBER 14, 2014 ☀ 7:30AM to 5:00PM

## WORKSHOP LOCATION

**Institute of Biosciences & Technology  
Texas A&M Health Science Center**

2121 W. Holcombe Blvd., Houston, TX 77030

To register, please visit the following link:

<http://engrevent.tamu.edu/event/101136>

*This short course hosted in conjunction by Baylor College of Medicine's National School of Tropical Medicine and Texas A&M's National Center for Therapeutics Manufacturing targets professionals interested in learning new skills to meet the demands of the rapidly changing biotechnology and biomanufacturing fields.*

## WORKSHOP OBJECTIVES

- Describe the vaccine development life cycle
- Identify the tools used in planning a vaccine development project
- Define a risk and describe the steps of a risk management plan
- Identify effective leadership qualities
- Learn to work with different personality types
- Application of knowledge through guided exercises and discussions

## ABOUT THE INSTRUCTORS

### Mike Roy, PhD

Dr. Roy is currently the Principal at Mike Roy and Associates where they consult for strategic planning in biotechnology and product development. He is also an Adjunct Professor at the University of Wisconsin-Madison as an instructor in the MS Biotechnology Program. Dr. Roy was previously a senior scientist at SAIC and the Vice President of Regulatory Affairs at PowderJect.

### Maria Elena Bottazzi, PhD

Dr. Bottazzi is the Associate Dean of the National School of Tropical Medicine at BCM and also a Professor in Department of Pediatrics in the Section of Tropical Medicine. She is also the Deputy Director of Sabin Vaccine Institute Product Development Partnership (PDP) and the Director of Product Development for the PDP. Dr. Bottazzi has had a successful career in trailblazing the way for vaccines against many Neglected Tropical Diseases for the past 15 years.

### Coreen Michele Beaumier, PhD

Dr. Beaumier is an Assistant Professor in the National School of Tropical Medicine at BCM and in the Department of Pediatrics in the Section of Tropical Medicine. She is also the Co-Director of Product Development for the Sabin Vaccine Institute PDP. Dr. Beaumier has worked in vaccine development for Tropical Diseases for the past five years focusing on many pathogens such as dengue, Hookworm, Chagas disease, Leishmania, and West Nile Virus.
