ONLINE COURSE

INTRODUCTION TO THERAPEUTICS MANUFACTURING is an exciting entry point into the field of pharmaceutical manufacturing. Offered completely online, the course provides a comprehensive overview of the pharma industry through interactive illustrations and knowledge building activities that can be performed at one's own pace. Participants will learn about:

- the drug/medical product development process;
- regulatory agencies and their functions;
- manufacturing techniques, facilities, and equipment;
- Good Manufacturing Practices and ensuring quality;
- and the variety of careers within this field.

Registration fee:

For a limited time, this course will be offered at no cost to participants. *Expires 02/13/15*

HOW TO REGISTER

1. Go to <https://nctmtp.teex.tamu.edu>
2. Create a new account, complete all the data entry fields, and click "submit form" – *remember your User Name and Password!*
