

NCTM

NATIONAL CENTER FOR THERAPEUTICS MANUFACTURING

FREE Training for TEXAS MILITARY VETERANS

(includes all classes, materials, room, board, and mileage)

NO GI BILL BENEFITS REQUIRED

The National Center for Therapeutics Manufacturing (NCTM) at Texas A&M appreciates military veterans' strong sense of responsibility, professionalism and dedication to mission success, as well as their ability to work in challenging and demanding environments – all qualities that will make them perfect additions to the pharmaceutical industry.

NCTM is seeking recently-discharged Texas service members interested in getting the skills needed to obtain a successful career in the fast-growing pharmaceutical and biotech industries.

Participants will receive a **Biomanufacturing Technical Certificate**, a program consisting of 30 hours of online learning and 4 weeks of hands-on technical training at the NCTM in College Station, Texas, including:

- Introduction to pharma-manufacturing
- Biotherapeutics industry science
- Procedures and documentation
- Facility operations and safety
- Upstream/downstream manufacturing
- Quality unit operations and employee skills

This program was made possible by a grant from the Governor of Texas' office, administered through TWC.

TRAINING DATES

SEP 28, 2015 ► Online Training Opens
OCT 14- NOV 6, 2015 ► Training at NCTM
